Dear Customer,

This letter is in reference to the possibility of Chloro Fluoro Carbons, CFC(s) in ISOFlex Packaging films. ISOFlex Packaging does not use any resins or additives that are produced with CFC(s) in the production of any of its films or products.

There is no reasonable expectation of accidental contamination beyond trace quantities existing in the environment.

In our opinion any CFC(s) that may have been in contact with the resin used to produce ISOflex film would not stay in contact with this resin in storage or during transfer to the production line. Therefore, we do not test for CFC(s) in ISOFlex Films.

Keith VanHulle
