Dear Customer.

ISOFlex Packaging certifies as follows:

ISOFlex Packaging is familiar with Section 1502 of the Dodd-Frank Act and the rules adopted by the US Securities and Exchange Commission related to conflict minerals (collectively, “Conflict Minerals Provisions”). Conflict minerals currently consist of gold, tin, tungsten, and tantalum. Terms used in this statement have the same meanings as the Conflict Minerals Provisions.

No conflict mineral is necessary or used in the production of ISOFlex Packaging films.

Letters are on file from all suppliers stating that they do not use conflict minerals in the manufacture of any resins supplied for manufacture of films by ISOFlex Packaging.

If I can assist with any additional information, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Keith Van Hulle".
